 **Dear Sir or Madam,**

We are very pleased to present a joint offer for perennials and grass young plants from the Vitroflora and Alkemade Perennials program. In recent years we have become the industry leader, offering the widest range of ornamental plants on the market. Our offer meets both the needs of typical perennial horticulture, targeted to the market of green areas and gardens, and specialized producers supplying large retail chains.

You will find a wealth of varieties with proven suitability for pot cultivation in larger containers (visual plants marked as V), and those classical for cultivation in pots P9 (landscape plants marked as L). Our many experiences in Poland, Germany and the Netherlands, both at our own locations and at our customers', allow us to determine the suitability of varieties for both market segments. Therefore, you will often find both V and L with the same variety!

In the current catalogue we present a number of interesting news. Particular attention should be paid to: Heliopsis ‚Oriole™ Yellow‘: a new standard among Heliopsis varieties ensuring spectacular, long flowering. Nepeta ‚Blue Planet™‘ with large blue flowers is another proposal that delights with dense flowering and short production period. Lythrum ‚Luminara™ Hot Pink‘ charms with electrifying pink flowers and stately, dark green leaves.

Our quality is well known, supported by almost 50 years of production experience. Vitroflora in vitro laboratory has the Elite Naktuinbouw certification, confirming the highest standards and skills in preparing the elite material. We constantly take care of the cleanliness and condition of nurseries and develop and apply proprietary technologies for propagation, acclimatization and preparation of young plants. For the convenience of our customers, we provide a variety of starting material standards. Thanks to three locations – in Poland, the Netherlands and Portugal – we can guarantee optimal growth conditions for our plants. All these activities have only one goal: to provide you with material for safe, easy and most importantly profitable cultivation.

Throughout the year we warmly invite you to visit our website www.vitroflora.pl, where you will find the most up-to-date offer and cultivation recommendations, and you will check availability for selected weeks and place an order in an easy and intuitive way.

We hope that by using our offer you will expand the group of people for whom the environment and nature are important! Let's take care of the beauty and richness of the world around us!

Vitroflora & Alkemade Team

Pawlak family - company owners
Anna i Karol Pawlak with their children - Filip, Agnieszka and Konrad

 Szanowni Państwo,

Jest nam niezmiernie miło przedstawić Państwu wspólną ofertę na sadzonki bylin i traw z programu Vitroflora i Alkemade Perennials. W ostatnich latach staliśmy się liderem branży, oferującym najszerszy asortyment wieloletnich roślin ozdobnych na rynku. Nasza oferta zaspakaja zarówno potrzeby typowych ogrodnictw bylinowych, ukierunkowanych na rynek terenów zieleni i ogrodów jak wyspecjalizowanych producentów zaopatrujących duże sieci handlowe.

Znajdziecie w niej bogactwo odmian o sprawdzonej przydatności do uprawy doniczkowej w większych pojemnikach (visual plants oznaczone jako V), oraz tych klasycznych do uprawy w doniczkach P9 (landscape plants oznaczone jako L). Liczne doświadczenia prowadzone przez nas w Polsce, Niemczech i w Holandii, w naszych własnych lokalizacjach i u naszych klientów, pozwalają na określenie przydatności odmian dla obu segmentów rynku. Stąd często przy tej samej odmianie znajdziecie zarówno V jak i L!

W obecnym katalogu prezentujemy szereg ciekawych nowości. Na szczególną uwagę zasługują: Heliopsis 'Oriole™ Yellow': nowy standard wśród odmian Heliopsis, zapewniający spektakularną długie kwitnienie. Nepeta 'Blue Planet™' z dużymi niebieskimi kwiatami to kolejna propozycja, która zachwyca gęstymi kwiatostanami i krótkim okresem produkcji. Natomiast Lythrum 'Luminara™ Hot Pink' urzeka elektryzującymi różowymi kwiatami i dostojnymi, ciemnozielonymi liśćmi.

Nasza jakość jest znana, wspierana prawie 50 letnim doświadczeniem w produkcji. Laboratorium in vitro Vitroflory posiada certyfikat Elite Naktuinbouw potwierdzający najwyższe standardy i umiejętności przygotowania materiału elitarnego. Nieustannie dbamy o czystość i kondycję mateczników oraz opracowujemy i stosujemy autorskie technologie rozmnażania, aklimatyzacji i przygotowania sadzonek. Dla wygody naszych klientów zapewniamy różnorodność standardów materiału wyjściowego. Dzięki trzem lokalizacjom – w Polsce, Holandii i Portugalii – możemy zagwarantować optymalne warunki rozwoju dla naszych roślin. Wszystko te działania mają tylko jeden cel: zapewnienie Państwu materiału do bezpiecznej, łatwej a przede wszystkim dochodowej uprawy.

Naszą ofertę znajdą Państwo na stronach www.vitroflora.pl lub www.alkemadepennials.com. Zapraszamy do kontaktu z naszymi przedstawicielami. Na stronie www.vitroflora.pl znajdują się kontakty telefoniczne i mailowe do osób posługujących się różnymi językami.

Cieszy nas rosnąca popularność bylin, w tym traw. Stanowią one nie tylko ozdobę naszego otoczenia ale także budując bioróżnorodność, zapewniając pożytek licznyim owadom w tym jakże cennym pszczołom miodnym oraz innym zwierzętom, pokazują jak ważna jest dla nas świadoma ekologicznie działalność.

Mamy nadzieję, że obficie korzystając z naszej oferty poszerzycie grono tych osób dla których środowisko i natura są ważne! Wspólnie dbajmy o piękno i bogactwo otaczającego nas świata!

Geachte Heer/Mevrouw.

Het is ons een genoegen om een gezamenlijke offerte te presenteren voor jonge planten van vaste planten en grassen uit het Vitroflora en Alkemade Perennials programma. In de afgelopen jaren zijn we uitgegroeid tot een marktleider en bieden we het breedste assortiment vaste sierplanten op de markt. Ons assortiment voldoet zowel aan de behoeften van typische vaste plantenkwekers die zich richten op de landschaps- en tuinarchitectuurmarkt als aan die van gespecialiseerde kwekers die aan grote winkelketens leveren.

U vindt bij ons een overvloed aan variëteiten waarvan bewezen is dat ze geschikt zijn voor het oppotten in grotere potten (visuele planten met het label V), en klassiekers voor het kweken in P9-potten (landschapsplanten met het label L). Dankzij de vele experimenten die we in Polen, Duitsland en Nederland hebben uitgevoerd, zowel op onze eigen locaties als bij onze klanten, kunnen we de geschiktheid van rassen voor beide marktsegmenten bepalen. Daarom treft u naast hetzelfde soort vaak zowel een V als een L aan!

In de huidige catalogus vindt u een aantal interessante nieuwe functies. Van bijzonder belang zijn: Heliopsis ‚Oriole™ Yellow‘: een nieuwe standaard onder de Heliopsis variëteiten, met een spectaculaire, lange bloei. Nepeta ‚Blue Planet™‘, met zijn grote blauwe bloemen, is eveneens een product dat indruk maakt met zijn dichte bloeiwijzen en korte productieperiode. Daarentegen betovert Lythrum ‚Luminara™ Hot Pink‘ met zijn elektriserende roze bloemen en statige donkergroene bladeren.

Onze kwaliteit is bekend en wordt ondersteund door bijna 50 jaar productie-ervaring. Het laboratorium voor in vitro van Vitroflora is gecertificeerd als Elite Naktuinbouw, wat de hoogste normen en vaardigheden in de bereiding van elite materiaal bevestigt. We zorgen er voortdurend voor dat het kwekerijmateriaal schoon en in goede conditie is en we ontwikkelen en gebruiken onze eigen technologieën voor vermeerdering, acclimatisatie en voorbereiding van jonge planten. Voor het gemak van onze klanten bieden wij verschillende standaarden voor uitgangsmateriaal. Dankzij drie locaties - in Polen, Nederland en Portugal - kunnen we optimale ontwikkelingsomstandigheden voor onze planten garanderen. Al deze activiteiten hebben maar één doel: u voorzien van materiaal voor een veilige, gemakkelijke en vooral winstgevende teelt.

U bent het hele jaar door van harte uitgenodigd om onze website www.vitroflora.pl te bezoeken, waar u het meest actuele aanbod en teeltaanbevelingen vindt, evenals een gemakkelijke en intuïtieve manier om de beschikbaarheid voor geselecteerde weken te controleren en uw bestelling te plaatsen.

Wij hopen dat u, door volop gebruik te maken van ons aanbod, de kring uitbreidt van mensen voor wie milieu en natuur belangrijk zijn! Samen moeten we zorgen voor de schoonheid en rijkdom van de wereld om ons heen!

Sehr geehrte Damen und Herren.

Wir freuen uns, ein gemeinsames Angebot für Jungpflanzen von Stauden und Gräsern aus dem Programm von Vitroflora und Alkemade Perennials vorstellen zu dürfen. In den letzten Jahren haben wir uns zu einem Branchenführer entwickelt, der das breiteste Sortiment an mehrjährigen Zierpflanzen auf dem Markt anbietet. Unser Sortiment deckt den Bedarf sowohl der typischen Staudengärtnereien, die auf den Garten- und Landschaftsbau abzielen, als auch der spezialisierten Produzenten, die große Einzelhandelsketten beliefern.

Sie finden darin eine Fülle von Sorten, die sich nachweislich für das Einpflanzen in größere Gefäße eignen (Visual Plants mit der Kennzeichnung V), und die Klassiker für den Anbau in P9-Töpfen (Landscape Plants mit der Kennzeichnung L). Die zahlreichen Versuche, die wir in Polen, Deutschland und den Niederlanden sowohl an unseren eigenen Standorten als auch mit unseren Kunden durchgeführt haben, ermöglichen die Eignung der Sorten für beide Marktsegmente zu bestimmen. Daher findet man oft sowohl ein V als auch ein L neben ein und derselben Sorte!

Der aktuelle Katalog enthält eine Reihe von interessanten Neuheiten. Besonders hervorzuheben sind: Heliopsis ‚Oriole™ Yellow‘: der neue Standard unter den Heliopsis-Sorten, mit einer spektakulären, langen Blütezeit. Nepeta ‚Blue Planet™‘ mit ihren großen blauen Blüten ist ein weiteres Angebot, das durch seine dichten Blütenstände und seine kurze Produktionszeit beeindruckt. Lythrum ‚Luminara™ Hot Pink‘ hingegen besticht durch elektrisierende rosa Blüten und stattliche dunkelgrüne Blätter.

Unsere Qualität ist bekannt und wird durch fast 50 Jahre Erfahrung in der Produktion gestützt. Das In-vitro-Labor von Vitroflora wurde als Elite Naktuinbouw zertifiziert, was die höchsten Standards und Fähigkeiten bei der Vorbereitung des Elitematerials bestätigt. Wir kümmern uns ständig um die Sauberkeit und den Zustand des Baumschulmaterials und entwickeln und verwenden eigene Technologien für die Vermehrung, Akklimatisierung und Vorbereitung der Jungpflanzen. Um unseren Kunden die Arbeit zu erleichtern, bieten wir eine Vielzahl von Standards für Ausgabematerial an. Mit drei Standorten - in Polen, den Niederlanden und Portugal - können wir optimale Entwicklungsbedingungen für unsere Pflanzen garantieren. All diese Aktivitäten haben nur ein Ziel: Ihnen das Material für einen sicheren, einfachen und vor allem rentablen Anbau zu liefern.

Das ganze Jahr über sind Sie herzlich eingeladen, unsere Website www.vitroflora.pl zu besuchen. Dort finden Sie die aktuellsten Angebote und Anbauempfehlungen sowie eine einfache und intuitive Möglichkeit, die Verfügbarkeit für ausgewählte Wochen zu prüfen und Ihre Bestellung aufzugeben.

Wir hoffen, dass Sie durch die rege Nutzung unseres Angebots den Kreis derer erweitern, denen Umwelt und Natur wichtig sind! Lassen Sie uns gemeinsam für die Schönheit und den Reichtum der Welt um uns herum sorgen!

 Mesdames et Messieurs

Nous sommes très heureux de pouvoir vous présenter notre offre de jeunes plantes vivaces et de graminées de la gamme Vitroflora et Alkemade Perennials. Au cours des dernières années, nous sommes devenus un vrai leader de notre secteur avec la plus large gamme de plantes vivaces décoratifs. Notre offre répond aux besoins des horticulteurs orientés sur le marché des espaces verts et des jardins, et des distributeurs spécialisés dans l'approvisionnement de grandes chaînes de distribution.

Vous y trouverez une multitude de variétés qui peuvent être cultivés dans les pots et plus grands casiers (plantes marquées d'un V), ainsi que des variétés classiques pour la culture dans les pots P9 (plantes paysagères marquées d'un L). Nos nombreuses expériences en Pologne, en Allemagne et aux Pays-Bas, tant sur nos propres sites que chez nos clients, nous permettent d'adapter des variétés pour les deux segments de marché. Ainsi, vous trouverez souvent des V et des L avec la même variété !

Dans le catalogue actuel, nous présentons une multitude de nouveaux produits intéressants. Avant tout: Heliopsis ‚Oriole™ Yellow‘ : une nouveauté parmi les variétés Heliopsis, elle se caractérise par une floraison spectaculaire et longue. Nepeta ‚Blue Planet™‘ avec ses grandes fleurs bleues est une autre variété qui impressionne par ses inflorescences denses et sa courte période de production. Lythrum ‚Luminara™ Hot Pink‘ enchante par ses fleurs roses électrisantes et ses feuilles majestueuses vert foncé.

Notre qualité est reconnue et prouvée par près de 50 ans d'expérience dans la production. Le laboratoire in vitro Vitroflora possède le certificat Elite Naktuinbouw, confirmant les normes et les compétences les plus élevées dans la préparation de matériel d'élite. Nous veillons constamment à la propreté et à l'état des pépinières et développons et utilisons des technologies exclusives pour la propagation, l'acclimatation et la préparation des jeunes plants. Pour le confort de nos clients, nous proposons une variété de normes de matières premières. Grâce à trois implantations - en Pologne, aux Pays-Bas et au Portugal - nous pouvons garantir des conditions de développement optimales pour nos plantes. Toutes ces démarches n'ont qu'un seul objectif : vous fournir du matériel pour une culture sûre, facile et surtout rentable.

Tout au long de l'année, nous vous invitons cordialement à visiter notre site Web www.vitroflora.pl, où vous trouverez l'offre la plus récente et les recommandations de culture, et vous pouvez vérifier facilement et intuitivement la disponibilité pour les semaines sélectionnées et passer une commande.

Nous espérons qu'en profitant de notre offre, vous élargirez le groupe de personnes pour qui l'environnement et la nature sont importants ! Prenons ensemble soin de la beauté et de la richesse du monde qui nous entoure !

 Eastern Europe Уважаемые господа!

Мы очень рады представить совместное предложение на саженцы многолетних растений и трав из программы Vitroflora и Alkemade Perennials. В последние годы мы стали лидером отрасли, предлагая самый широкий ассортимент многолетних декоративных растений на рынке. Наше предложение отвечает как потребностям типичного многолетнего садоводства, ориентированного на рынок зеленых насаждений и садов, так и специализированным производителям, поставляющим продукцию крупным розничным сетям.

Вы найдете множество сортов, с доказанной пригодностью для выращивания в больших контейнерах (визуальные растения, обозначенные V), и классических для выращивания в горшках P9 (ландшафтные растения, обозначенные L). Многочисленный опыт, накопленный нами в Польше, Германии и Нидерландах как и в наших собственных странах, так и с нашими клиентами, позволяет нам определить пригодность сортов для обоих сегментов рынка. Поэтому часто в одном и том же сорте вы найдете обозначения как V, так и L!

В текущем каталоге мы представляем ряд интересных новинок. Особого внимания заслуживают следующие: Гелиопсис ‚Oriole™ Yellow‘: новый стандарт среди сортов гелиопсиса, обеспечивающий эффектное продолжительное цветение. Nepeta ‚Blue Planet™‘, с большими синими цветами — еще одно предложение, которое впечатляет густыми соцветиями и коротким сроком выращивания. С другой стороны, Lythrum ‚Luminara™ Hot Pink‘ очаровывает своими яркими розовыми цветами и величественной темно-зеленой листвой.

Наше качество хорошо известно, что подтверждается почти 50-летним производственным опытом. Лаборатория in vitro Vitroflora сертифицирована Elite Naktuinbouw, что подтверждает самые высокие стандарты и навыки в подготовке элитного материала. Мы постоянно заботимся о чистоте и состоянии питомников, разрабатываем и применяем авторские технологии размножения, акклиматизации и подготовки саженцев. Для удобства наших клиентов мы предоставляем различные стандарты исходного материала. Благодаря трем филиалам — в Польше, Нидерландах и Португалии — мы можем гарантировать оптимальные условия для развития наших растений. Все эти действия преследуют только одну цель: предоставить вам материал для безопасного, простого и, прежде всего, прибыльного выращивания.

В течение всего года мы радушно приглашаем вас посетить наш сайт www.vitroflora.pl, где вы найдете самые актуальные предложения и рекомендации по выращиванию, а также простой и интуитивно понятный способ проверить наличие на выбранные недели и сделать заказ.

Мы надеемся, что, активно пользуясь нашим предложением, вы расширите круг тех, для кого важна окружающая среда и природа! Давайте вместе позаботимся о красоте и богатстве окружающего нас мира!

Perennials Pot Trials

Every year we run perennials pot trials of our existing assortment and all our new introductions. This helps us to collect all the necessary information about those plants to increase the knowledge of our team and our customers.

Feel welcome to visit our trials in Germany and Poland!

Alter Kirchweg 10
47638 Straelen, GERMANY
