

Grower of young plants

About Stars-Plant

Stars-Plant is a young, ambitious company with knowledge of growing young plants. In 1.5 hectare greenhouse the young-plants are grown with great care and dedication. In this catalog you will find our complete assortment. Do you have some questions about our assortment regarding your cultivation conditions? Please contact us!

Because the roots of Starsplant is located in growing flowers, we know how to make a good translation to your needs and provide you with the correct plant size. Stars-Plant knows what you as a grower needs for a successful crop.

The nursery is equipped with assimilation lighting and an automatic seeder. Our company is located south-west of Gelderland in the beautiful surroundings of the river the Maas.

Craspedia

Drumstick

An **amusing** plant with spherical inflorescences, suitable for both cut flower culture as well as for drying. The flowers have a **good vase life**. Golden yellow. Height: **95 cm**.

Celosia

Act Dara (Velvet)

Our **Celosia Act** series is **market leader** in the Netherlands. The exotic brightness of the flowers appeals to consumers world wide. Thanks to the extremely short cultivation time, uniform plant development and **better resistance** to Botrytis and Fusarium, the cut flower production of the Act series has **strongly increased** over the past year.
