TAKII SEED

Dear reader,

We are pleased to present our 2025-2026 cut flower and pot & bedding brochure, featuring only the latest additions to our existing series.

At Takii Europe, we take pride in our commitment to reliability, quality and innovation. Based in De Kwakel, The Netherlands, we serve regions across Europe, the Middle East, Africa and Central Asia, providing superior seed varieties.

This catalogue highlights our newest introductions:

Cut flowers: Exciting new colour varieties in the Brassica Crane Series, Lisianthus Arena, Corelli and Croma series, along with the new introduction of the Callistephus Nina Plus Series.

Pot & bedding plants: Three vibrant new colour varieties in the Floral Power Series.

For the latest updates on our continuously expanding assortment, do not hesitate to visit our website at www.takii.eu or scan QR code down below. If you need further details or assistance, feel free to reach out to a Takii representative.

Thank you for considering Takii Europe.

Kind regards,

The Takii Europe Team

Find out more
about Crane
F1 series

Crane F1

Brassica oleracea

Cold-climate excellence, robust visual appeal

Germination temperature
20-25°C

Days to germinate
4-6 days

Stem length
60-90 cm

New

Early Red
FHB687

A new addition to this Crane series is the Early Red. Crane series excel in cold climates with uniform, upright growth and compact flower heads that allow size adjustment via spacing.

Known for long vase life and robust visual appeal, it features round leaves in a range of colours. Series members are Crane Feather with unique feathered leaves and Crane Ruffle with elegant ruffled leaves, offering diverse textures for winter bouquets.

New

Nina Plus Series

Callistephus chinensis

Excellent for mixed bouquets

*Light required -Germination
temperature 20-25°C*

*Days to germinate
6-8 days*

*Stem length
60-75 cm*

This new Nina Plus series is a stunning spray-type China Aster, producing an abundance of charming 3–4 cm semi-double flowers. With its vigorous growth habit and exceptional uniformity across the series, this variety stands out for its strong, resilient petals.

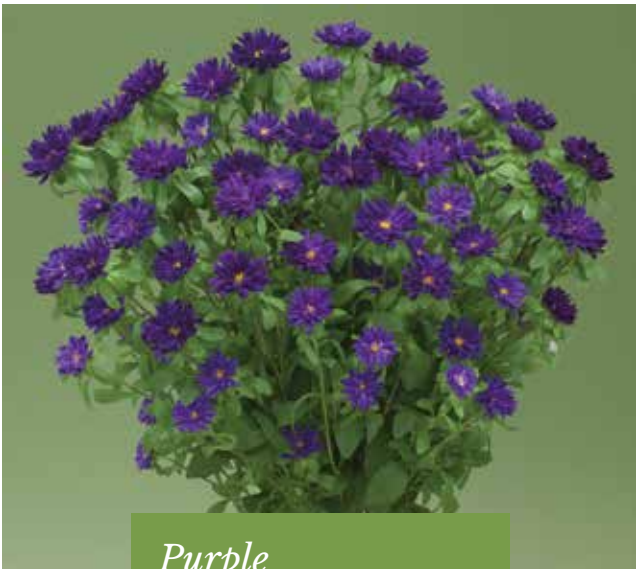

Boasting the highest Fusarium resistance within Takii's Callistephus assortment, Nina Plus also demonstrates improved tolerance to Botrytis, ensuring healthier plants and longer-lasting blooms. Perfect for vibrant garden displays and professional cultivation alike.

Arena F1

Lisianthus grandiflorum

New colour addition to *Arena*; 3 Lavender

*Light required -Germination
temperature* 20-22°C

Days to germinate
20-25 days

Stem length
70-90 cm

The Arena Lisianthus series is distinguished by its fully double, large and high-quality blooms held on strong and sturdy stems. Its thick petals ensure excellent transportability, while large buds atop sprays enhance the appeal of each stem.

With a range of flowering earliness from group I (1) to group IV (4), growers can select varieties that suit their production schedules. Moreover, the Arena series has a wide array of colours, offering options to meet diverse market demands and preferences.

Variety specifics Arena F1

Variety specifics Arena F1							
Variety name			Flower size cm	Branching	Plant height	Stem strenght	Characteristic
Arena	3	Lavender	8	Normal	Tall	Hard	Deep lavender colour with round petal

Actual results are dependent upon environmental conditions and local practices that may affect variety characteristics and performance.

*Find out more about
Arena F1 series*

Graceful elegance and benevolent luxury are in perfect harmony. Corelli brings everything together. With its lovely colours, it brings classic ambience in a modern style, with a little sense of drama.

Corelli. You deserve nothing less.

Corelli F1

Lisianthus grandiflorum

Large to extra-large, double flowers with fringed, curly petals

Germination temperature
20-22°C

Days to germinate
20-25 days

Stem length
70-90 cm

Four new colours to the Corelli F1 assortment. Renowned for its large to extra-large, double flowers with fringed petals and impeccable bud presentation. Growers benefit from vigorous growth, sturdy, upright stems and reduced tip burn.

Classified from I (1) to III (3) by blooming time, including 'Sugoi' (SU) varieties with extra-large, fringed petals.

Versatile, high quality and wide colour range cater to growers' needs in various climate conditions and areas, ensuring exceptional results.

Croma F1

Lisianthus grandiflorum

Elegant, rose-like flowers with high doubleness

Germination temperature
20-22°C

Days to germinate
20-25 days

Stem length
70-90 cm

2 Blue
FRS905

Five new varieties were added to the Croma Lisianthus series that showcases elegant, rose-like flowers with high doubleness, offering a touch of sophistication to any arrangement. Medium-sized blooms, sturdy stems and thick petals ensure easy handling and transportation, adding to its market value.

With a range of colours and earliness in flowering time, from category II (2) to category IV (4), Croma caters to different growing environments and needs.

Variety comparison among Croma F1							
Variety Name			Flower Size cm	Branching	Plant height	Stem strenght	Characteristic
Croma	2	Blue	7	Good	Tall	Hard	Good doubleness
Croma	2	Pink	7	Good	Tall	Medium	Easy to get sufficient height
Croma	3	Lavender	6,5	Normal	Medium	Medium	Earlier into flowering; lighter colour
Croma	3	Pink	7,5	Good	Tall	Hard	Large flower diameter
Croma	3	Purple	6,5	Good	Tall	Medium	Dark flowerbuds

Actual results are dependent upon environmental conditions and local practices that may affect variety characteristics and performance.
