innovation & craftsmanship

Sakata Ornamentals Europe is excited to present our newly restyled catalogue, featuring our latest introductions! We are proud of the top-quality genetics showcased, a testament to our rich history, dedication, and innovation.

The recent years have brought challenges, with global developments requiring us to adapt and create a resilient, future-proof ornamental industry. Despite uncertainties, the industry continues to enrich lives. The role of ornamental products remains important, and we are committed to delivering them with a smile.

“Explore our novelties and featured products in this catalogue or on our website.”

At Sakata, our commitment to authentic discipline, finesse, and craftsmanship shapes our work. These values infuse our breeding processes and product presentation, ensuring consistent quality and impactful decisions.

Our management philosophy is rooted in the principles of mutual prosperity, mutual interest, and mutual harmony. We aim for continuous coexistence among nature, society, and businesses, accelerating our sustainability management to create a sustainable society and environment.

Success in today's market hinges on effective connections. Every link in the commercial chain, from breeder to consumer, must support each other for the final product. Sakata fosters these connections, offering products that add value for distributors, plug producers, growers, retailers, and consumers.

Explore our novelties and featured products in this catalogue or on our website. We strive to provide a complete package of premium ornamental genetics. Through our motto ‘Quality, Reliability, Service,’ we strive to contribute to the betterment of life and culture worldwide.

We wish you good health, prosperity, and every success in growing your business with Sakata genetics!

Location
Denmark

award winning varieties

Sakata regularly enters new varieties into industry trials to be judged by peers and experts. Both the Fleuroselect and All-America Selections entries are evaluated anonymously under code number in numerous trial grounds in different locations. Awards granted by both organisations are universally recognised as true symbols of excellence.

Fleuroselect

Sakata is a member of Fleuroselect, the international organisation for the ornamental plants industry. Entries in the Fleuroselect Trials which are judged to be true breeding breakthroughs are awarded the prestigious Fleuroselect Gold Medal.

Fleuroselect Gold Medal Winners:

- Zinnia Profusion Red Yellow Bicolour
- Zinnia Profusion Red
- Begonia Senator iQ Rose Bicolour
- Zinnia Profusion Double Hot Cherry

All-America Selections

Sakata is also a member of All-America Selections, an independent non-profit organization that tests new, never-before-sold varieties for the home gardener. Only the top garden performers are given the AAS Winner award designation for their superior performance.

AAS gold medal winners:

- Zinnia Profusion Red Yellow Bicolour
- Begonia Viking Explorer Rose on Green

AAS medal winners:

- Celosia Flamma Orange
- Begonia Viking XL Red on Chocolate
- Gypsophila Gypsy White
- Zinnia Profusion Double Hot Cherry
- Zinnia Profusion Double Deep Salmon

Emsflower

Emsflower GmbH is a bedding plant grower, headquartered in Emsbüren, Germany. Every year Emsflower organizes trials with new varieties of several crops from breeders.

Emsflower

Emsflower Trials Top 10:

- Begonia Viking Pink on Chocolate
- Zinnia Profusion Red Yellow Bicolour
- Gomphrena PingPong Purple

GROW FOR VICTORY

ALL WEATHER BEGONIA VIKING™

A top performer to grow for victory! Meet the Viking series. Viking trials all over Europe are proving just how great these series are!

The 3 Viking series are perfect for adding vibrant colour to outdoor spaces. Viking Begonias are available in green, bronze and breakthrough chocolate leaf. Chocolate-leaved is unique in this class and has the most intense, darkest leaves under all conditions. Continuous flowering and a range of colours, make this spectacular hybrid Begonia an exciting invasion on the market!

USP'S VIKING SERIES

- All weather Begonia
- Massive flowering
- Flowers all season till the frost sets in
- High diversity of flower colours and leaves
- Germination 90%+

MEET THE 3 VIKING™ SERIES

VIKING™

Begonia Viking™ is excellent for large containers and landscaping.

VIKING™ XL

The extra vigorous Viking™ XL series is developed for use in large showy garden containers and as an optimal landscaping performer.

VIKING™ EXPLORER

Viking™ Explorer thrives in balcony boxes, containers, hanging baskets and bowls and has a huge advantage in lower light conditions.

3 LEAF COLOUR CLASSES

A FEW OF THE MANY EXCITING TEST RESULTS

Begonia Viking™ | Sakata's Viking Pink on Chocolate placed in the top 10 of Emsflower trials with an impressive average score of 4.7 out of 5! Thoroughly tested over time and evaluated on multiple criteria - such as continuous growth (4.6), flower arrangement (4.6), and richness (4.7) - our Viking is a real winner, always in top condition.

Begonia Viking™ XL | The more vigorous XL series is proved a stunning performer in landscaping. Beds with many metres of Viking XL keep on flowering for months – from May till the frost sets in. A beautiful flower with a bold colour. This bedding for sure brightens up every landscape.

Begonia Viking™ Explorer | This winner became Pflanze des Jahres in Sud Tirol in 2024, made it into the Top 10 at Emsflower Trial Garden and outperformed many other species in trials at Veneto Agricoltura. Trials confirm Explorer as easy to care for, robust and extremely attractive hanging from balconies, even at walls facing north.

Viking

- Developed for use in large showy garden containers and as an optimal landscaping performer
- Choice out of three different leaf colours: Green, Bronze and unique Chocolate
- All weather Begonia
- Extreme blooming power through the whole season: hot, cool, dry, wet

A close-up, macro photograph of several small green seedlings and orange-brown seeds on a white, textured surface. The seedlings have two small, rounded leaves and a thin stem. The seeds are oval-shaped and have a slightly cracked texture. The background is out of focus, showing more seeds and seedlings. Two thin, hand-drawn, light brown lines curve across the image, one from the top left and another from the bottom right, framing the central area.

ENJOY MONTHS OF THIS SUN & SHADE LOVER

The SunPatiens® owes its name to its sunny origins. Due to its tropical roots, the SunPatiens is a real survivor in various weather conditions. This robust Impatiens loves sun and shade, but most of all it loves to 'shine' in your garden or on your patio.

- Long-lasting flowering, from May till October (or till the first frost)
- Enormous colour impact: large number of flowers and continuous flowering
- Low maintenance
- Can grow in full sun as well as in the shade
- Can handle any weather condition: from rain and high humidity to extremely dry and warm weather!
- Very strong plant, disease and insect resistant.

DISCOVER THE 3 SUNPATIENS® SERIES

SUNPATIENS PATIO

Ideal for use on the patio, terrace and balconies.

Ideal for production in 10,5 - 15 cm pots.

SUNPATIENS COMPACT

Bred and selected for containers and bedding plantings.

Ideal for production in 13 - 17 cm pots.

SUNPATIENS VIGOROUS

Ideal in larger landscape plantings and large containers.

Ideal for production in 15 - 23 cm pots.

SUNPATIENS GIVES BACK TO NATURE

SunPatiens® has been giving back to nature since the early 2000s, when Sakata Seed Corporation, the breeder of SunPatiens®, reached an agreement with the Indonesian Government (IAARD) in relation to the botanical species of Impatiens from which SunPatiens® is partly derived. This means that for every SunPatiens® plant that is sold, a contribution is made to Indonesia for local research into the maintenance of the biodiversity in that country. When you buy SunPatiens®, you give back to nature.

SunPatiens® was developed in collaboration with the Indonesian Agency for Agricultural Research and Development (IAARD) for access to its native resources. In return Sakata pays a share of the SunPatiens royalty into the maintenance of the biodiversity in Indonesia.

AGROSTANDAR

RECOMMENDATIONS FOR GROWING

SunPatiens® tolerates much cooler temperatures than most regular Impatiens New Guinea, offering great advantages for both consumers and growers. Keep temperature at 16 - 18°C in the first week (approximately) after transplanting. After plants are established, temperature can be lowered to an average day temperature of 14 - 15°C. Temperatures below 12°C are not recommended for a long period of time.

Did you know SunPatiens purifies the air?

Independent research has proved that SunPatiens absorbs nitrogen dioxide 3 to 4 times better than the average plant. Planting SunPatiens® can therefore contribute to air purification. In countries with a warm climate, it has even been demonstrated that SunPatiens® can contribute to air cooling.
