**TAKII SEED**

Dear reader,

We are thrilled to unveil the 2024/25 pot & bedding catalogue from Takii Europe, a proud member of the Takii family, globally recognized for top-quality breeding in both flowers and vegetables. Our commitment to reliability, quality, and innovation is evident from our base in De Kwakel, The Netherlands. Serving regions across Europe, the Middle East, Africa, and Central Asia, Takii Europe provides superior seed varieties, all stemming from our dedicated breeding stations and production sites around the world.

This catalogue showcases our latest pot and bedding assortment, thoughtfully developed to cater to diverse market needs and climate conditions. Notable highlights include the introduction of new colour varieties to the Petunia 'Opera Supreme F1', Viola 'Floral Power F1' and Zinnia 'Belize' series and the debut of the 'Helianthus 'Smiley F1', Viola 'Vivaldi F1' and the Zinnia 'Belize Double' series. All new additions have been bred to provide distributors, young plant raisers and growers with valuable opportunities to expand their offerings and effectively respond to evolving market demands.

To stay updated with our continuously expanding assortment, please visit our website at [www.takii.eu](http://www.takii.eu). For more details or assistance, feel free to contact a Takii representative.

Thank you for considering Takii Europe. We eagerly anticipate the opportunity to connect with you and assist in selecting the varieties that best suit your market's needs.

With respect,

The Takii Europe Team

# Flowerburst Red Shades

*Achillea millefolium*

*Germination temperature*  
17-20°C

*Days to germinate*  
3-4 days

*Stem length*  
60-75 cm

*Red Shades*  
*EACA02*

This hardy perennial stands up effortlessly to wind, drought, heat and humidity, blooming prolifically in a dazzling array of mainly red, rose, and violet shades.

With a height of 50 to 60 cm, it's an ideal choice for pots and bedding, ensuring a garden display that is vibrant and enduring.

*Berries*  
FACA03

Summer is a hardy perennial that blooms from summer to autumn in its first year and starts even earlier in the second.

It thrives in sunny spots, promising vibrant displays for extended periods.

## Summer

### *Achillea millefolium*

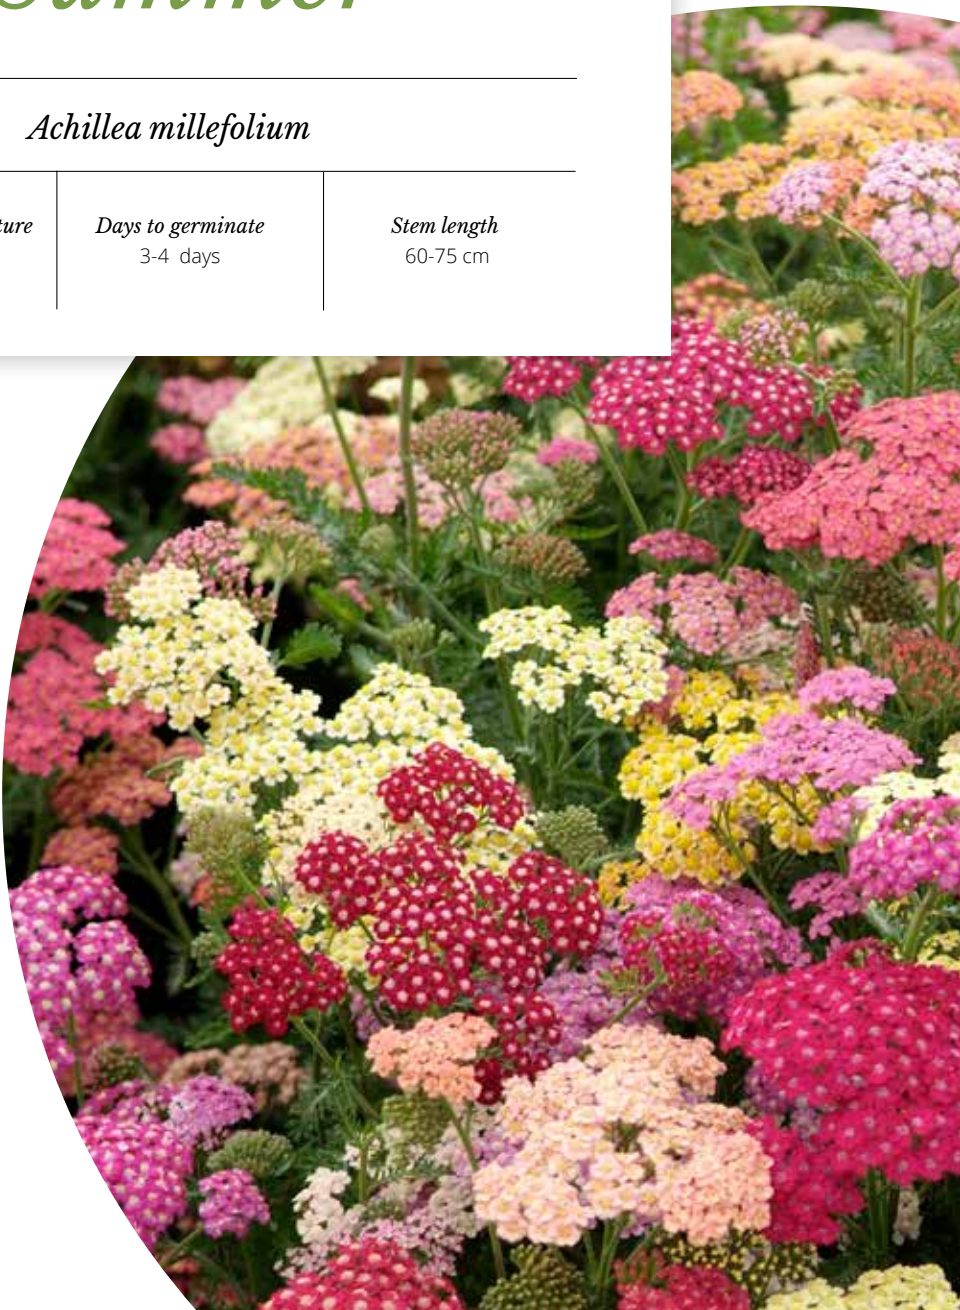

*Germination temperature*  
17-20°C

*Days to germinate*  
3-4 days

*Stem length*  
60-75 cm

*Pastels*  
FACA04

# Arizona

*Agastache x hybrida*

Perfect for easy maintenance gardens

*Germination temperature*  
20-22°C

*Days to germinate*  
5-7 days

*Plant height*  
20-25 cm

Arizona features compact, floriferous spikes of mint and lemon-scented flowers from summer to autumn.

Its grey-green foliage complements dense, tubular blooms. Blooming like an annual with perennial toughness, it's fast-growing from spring sowing, requiring minimal care in dry, sunny spots.

*Sandstone*  
*FATA22*

*Sun*  
*FATA21*

*Sunset*  
*FATA23*

*Apricot*  
*FHAA07*

# *Spring Celebrities*

*Alcea rosea*

Ensuring a long-lasting, vibrant garden display

*Germination temperature*  
15-20°C

*Days to germinate*  
7-10 days

*Plant height*  
60-80 cm

Spring Celebrities is a dwarf Hollyhock series known for its large, double to semi-double flowers and superb basal branching.

Ideal for containers, beds and borders, it flowers from May to frost, even in its first year, for up to three months under favourable conditions.

This series offers uniformity in earliness, height, habit and flower form, ensuring a long-lasting, vibrant garden display.

*Carmine-Rose*  
FHAA02

*Crimson*  
FHAA09

*Formula Mixture*  
FHAA00

*Lemon*

# *Fiona F1*

*Begonia semperflorens*

Ideal for those seeking beauty

*Germination temperature*  
22-24°C- Light required

*Days to germinate*  
7-10 days

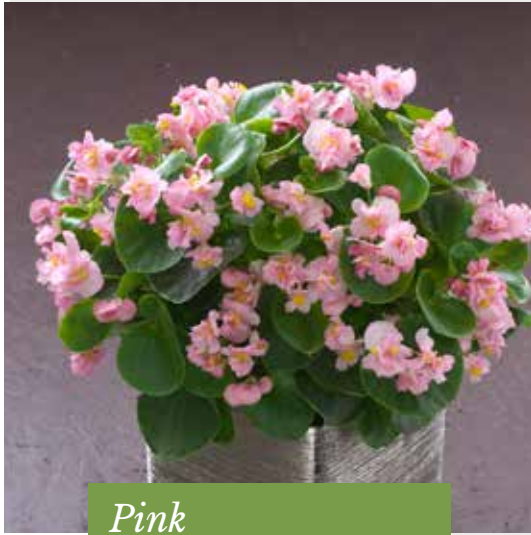

*Plant height*  
20-25 cm

Fiona features upright semi-double blooms that shine from summer to frost.

Self-cleaning and low-maintenance, it's perfect for containers, offering continuous colour.

With exceptional garden performance and a long flowering period, Fiona's large, full blooms elevate semi double-flowered Begonias to new heights, ensuring it's a standout all season.

# *Coral & Peacock F1*

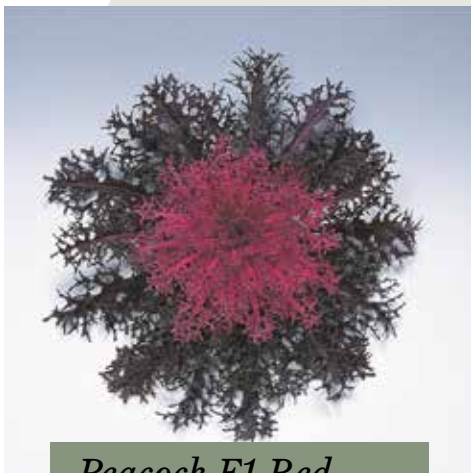

*Brassica oleracea*

Feather-leaved flowering kale

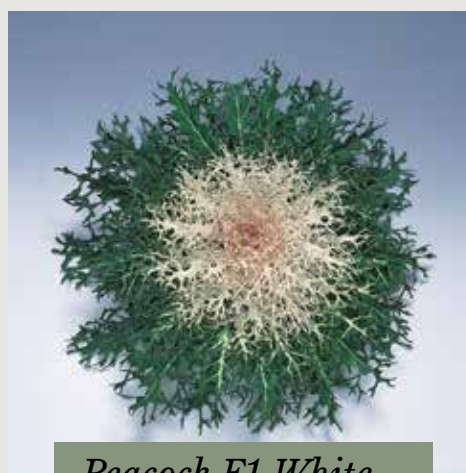

*Germination temperature*  
20-25°C

*Days to germinate*  
4-6 days

*Stem height*  
20-30 cm

*Peacock F1 Red*  
FHB621

*Peacock F1 White*  
FHB622

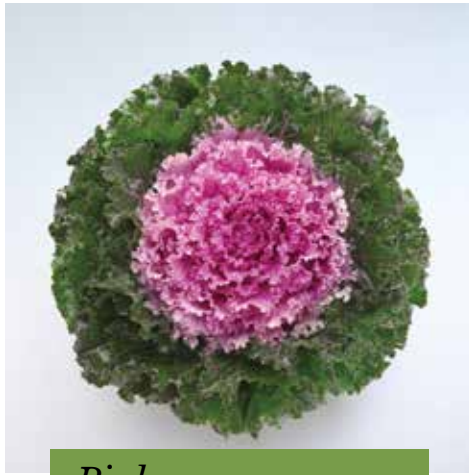

Robust plants with thick, sturdy stems.

The plants can withstand frosts and freezes and work well in wet conditions as their open feathery leaves are less likely to trap and hold water than fringed- and round-leaved types.

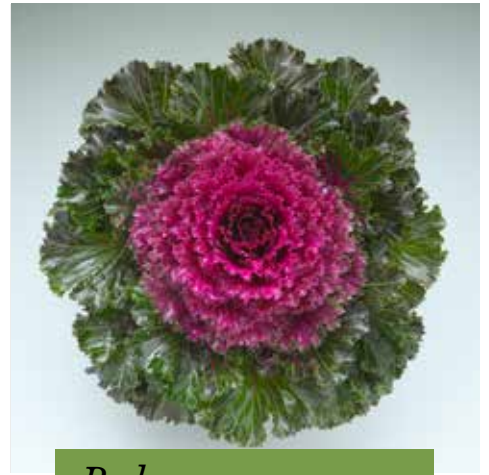

*Deep Red*  
*FHB757*

*Pink*  
*FHB758*

*Red*  
*FHB755*

# *Crystal F1*

*Brassica oleracea*

Compact, glossy-leaf flowering kales with finely ruffled edges

*Germination temperature*  
20-25°C

*Days to germinate*  
4-6 days

*Stem height*  
15-25 cm

*Snow*  
*FHB756*

# *Kamome F1*

---

*Brassica oleracea*

---

For autumn and winter season offerings

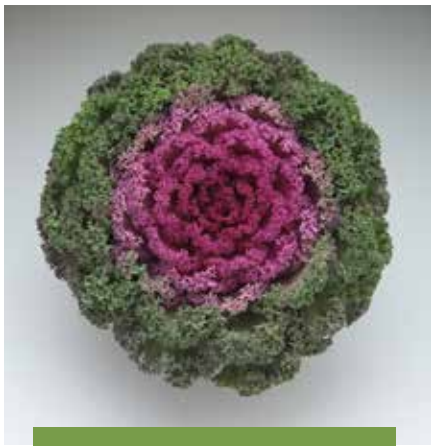

---

<i>Germination temperature</i> 20-25°C	<i>Days to germinate</i> 4-6 days	<i>Plant height</i> 15-25 cm
---	--------------------------------------	---------------------------------

The Kamome Brassica series is distinguished by the delicately fringed edges of its leaves, adding depth and texture to autumn and winter gardens.

It thrives in outdoor cultivation and withstands frost. Cooler night temperatures further enhance its vivid colouration.

# *Takion F1*

---

*Campanula persicifolia*

---

Excels in both beauty and resilience

---

<i>Germination temperature</i> 15-20°C	<i>Days to germinate</i> 15-20 days	<i>Plant height</i> 40-60 cm
---	--	---------------------------------

Takion excels in both beauty and resilience. Blooming extra early and surpassing other varieties in heat and cold tolerance, it withstands temperatures down to -20°C.

Its exceptional basal branching results in 6 to 8 sturdy stems, each supporting a display of knee-high, upright bell-shaped flowers.

# *Cannova<sup>®</sup>F1*

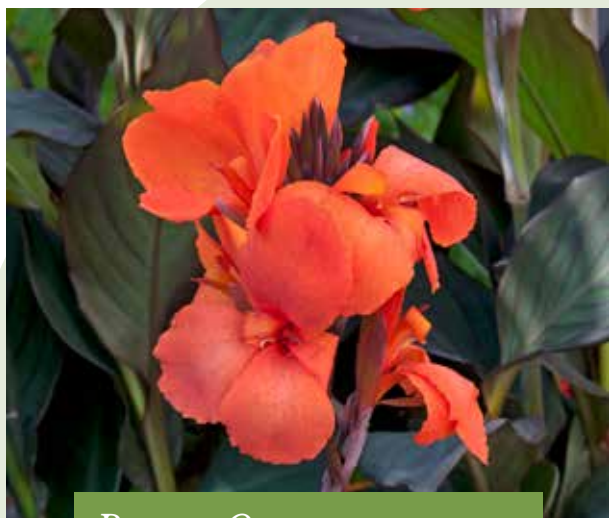

*Canna generalis*

Color Botanica

*Germination temperature*  
20-30°C

*Days to germinate*  
10-15 days

20-30°C

*Days to germinate*  
10-15 days

*Plant height*  
60-75 cm

*Rose*  
*FCA402*

South Pacific, a hybrid dwarf Canna series from seed, thrives in hot and humid conditions, flourishing with an abundance of flowers all season on heavily branching plants.

Beautiful in garden borders, containers, pots and ideally suited for shallow areas of ponds and water features, it brings continuous colour and vitality to a variety of settings.

# *Tropical*

*Canna generalis*

A dwarf Canna collection from seed

*Germination temperature*  
20-30°C

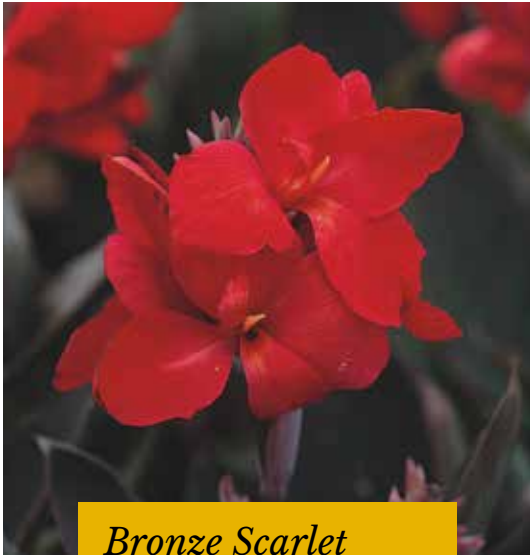

*Days to germinate*  
10-15 days

*Plant height*  
60-75 cm

The Tropical series, a dwarf Canna collection, flourishes in warm and humid conditions, offering a fast production period.

These plants are known for readily producing offsets, ensuring full finished pots that create tremendous consumer appeal with their vibrant colours and tropical flair.

# Harmony Mix

Matthiola incana

Uniform and dwarf branching Matthiola formula mix

<i>Germination temperature</i> 18-21°C - <i>Dark required</i>	<i>Days to germinate</i> 4-6 days	<i>Plant height</i> 15-25 cm
--	--------------------------------------	---------------------------------

### Selection tip for double flowered seedlings

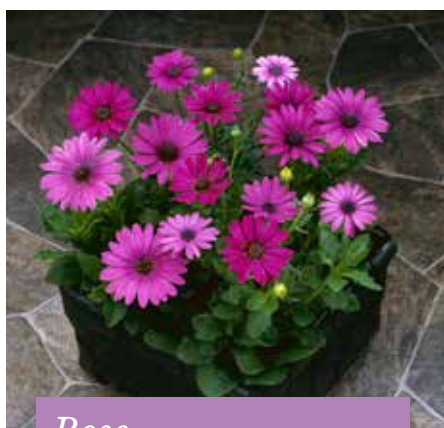

Series	Page	Timing of Selection	Selection Method	
Harmony	32	A pair of cotyledons	Select by colour, size and shape of cotyledon, also by growing speed  Double: Lighter green Larger leaves Grow faster (Taller)	Single: Darker green Smaller leaves Grow slower (Shorter)
Cinderella	33	Cotyledons and true leaves	Select by colour of leaves. Can be put in cold strage of 8°C for 2-3 days in cotyledon stage, then colour difference will be more clearly  Double: Lighter green Larger leaves	Single: Darker green Smaller leaves

Actual results depend on environmental conditions and local practices that may affect the variety's characteristics and performance.

# Opera Supreme F1

*Petunia x hybrida*

A premier series of trailing Petunias from seed

*Germination temperature*  
22-25°C - *Light required*

*Days to germinate*  
5-10 days

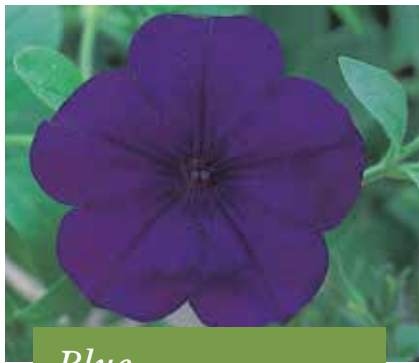

*Plant height*  
10-20 cm

Opera Supreme, celebrated for its exceptional trailing growth and early, abundant flowering, has quickly become the preferred choice among professional growers.

This premier series from seed, thrives with minimal day-length sensitivity, ensuring an earlier start in the production cycle.

Capable of spreading up to one meter, it's perfectly suited for enhancing large baskets, window boxes and landscapes with its vibrant, fully-covered floral display.

### Cultivation information Trilogy series

Family	Solanaceae
Plant width in cm	50 – 60 cm
Flower Size	6,5 – 7,5 cm
Germination info	Light required
Lead time young plant	5 - 6 weeks from sowing
Young plant to flower	5 weeks (sowing to flower time is 11 - 12 weeks)

# Evening Scentsation F1

*Petunia x hybrida*

Flowers exude a unique fragrance

*Germination temperature*  
22-25°C - *Light required*

*Days to germinate*  
5-10 days

*Plant height*  
10-20 cm

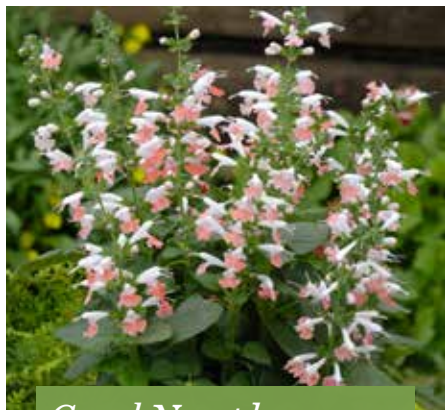

Evening Scentsation is a medium-sized, multiflora Petunia with a low, spreading habit.

Its flowers exude a unique fragrance, reminiscent of hyacinth, sweetened with notes of rose and honey and come in captivating shades of indigo.

This variety's scent intensifies in the evening, offering a delightful sensory experience that continues subtly throughout the day.

*Coral Nymph*  
FSRA11

# Hummingbird

*Salvia coccinea*

10-15 cm

Floral Power, Takii's extensive viola series, caters to professional growers' needs for early spring and autumn sales.

Bred for a dynamic retail environment, this series exhibits excellent growth, compactness and vigorous performance, guaranteeing abundant round flowers with firm petals in vibrant colours.

It creates tidy clusters, perfect for stunning pot displays or crafting delicate arrangements in small containers or along border edges.

With enduring flowering and a consistent, compact form, Floral Power provides enduring beauty.

# *Four Seasons F1*

*Viola cornuta*

Excellent performance in the spring

*Germination temperature*  
18-20°C

*Days to germinate*  
7-14 days

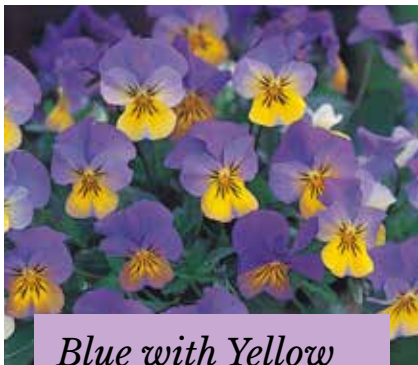

*Plant height*  
10-15 cm

Four Seasons Viola series is renowned for its trailing growth without excessive creeping, ensuring abundant blooms even on the top of plants.

With a later flowering period compared to normal viola types, these varieties excel in spring after producing substantial growth.

Ideal for hanging baskets, large pots and landscaping projects, they offer versatility and stunning floral displays.
